## Code Composer Studio

This is the description of the current configuration.

### Available Tasks

#### Scan for Updates

Search for updates for all the installed features.

#### View Installation History

View all activities since the installation of the product.

#### Show Activities

View the activities that caused the creation of this configuration.

#### Add an Extension Location

Locate and add an extension location to the current configuration. An extension location contains features and plugins previously installed.

#### Revert to Previous

You can revert to one of the previous configurations if you are having problems with the current one.
