#### **DESCRIPTION:**

ResinLab® UR6060 Clear is a two-part clear, colorless polyurethane that will cure at room temperature. It is commonly used for LED encapsulation, along with other high quality castings. This product has been formulated to provide excellent long-term non-yellowing UV stability, high transparency and water white clarity. It has a low viscosity and is easy to mix and process.

*UR6060 Clear* was formulated to a 1A:1B volume mix ratio for use in side-by-side cartridges and meter/mix and dispense equipment. *UR6060 Clear* will reach full cure at room temperature within 36 hours. Cure time can be accelerated by the application of heat. Two hours at 60 °C is sufficient to fully cure this product. Time to heat substrate must be taken into account. Cooler temperatures will extend work time and increase cure times.

*UR6060 Clear* is suitable for use in medical device assembly. It has been tested and is proven non-toxic per ISO 10993-5. Manufacturers should test their own finished product for biocompatibility. Certificates of compliance are available upon request.

### **TYPICAL PROPERTIES:**

All properties given are at 25 °C unless otherwise noted.

Property:	Value:	Test Method or Source:
Color	Clear, Colorless	Visual
Mix Ratio	Part A to Part B	Calculated
By weight	0.96 to 1	
By volume	1 to 1	
Cure Schedule	6 hours at room temperature	
	Full cure within 36 hours	
	2 hours @60 °C	
Viscosity – Part A	650 cps	Rheometer parallel plate 25mm
Viscosity – Part B	700 cps	455300006291
Viscosity - Mixed	1,050 cps	
Specific Gravity – Part A	1.08	Calculated
Specific Gravity – Part B	1.13	
Specific Gravity - Mixed	1.10	
Pot Life, defined as the time it takes for	15 minutes	Rheometer parallel plate 25mm@1/s
initial mixed viscosity to double		455300006291
Gel Time	15 - 20 minutes/100cc sample	455300005339/Gardco Hot Pot Gel Timer
Glass Transition Temperature/Tg	-2 °C	453560822409 by DSC
Hardness	80 Shore A	455300006287/ASTM D2240
Water Absorption	0.21% after 24 hours	457561824543/ASTM D570
Peak Exotherm	96.5 °C after 25 minutes for 40mL sample	455300005593 by Type K thermocouple
Tensile Properties:		455300006285/ASTM D638
Strength	400 psi	
Elongation	25%	
Modulus	1,500 psi	
Lap Shear Strength		
0.010" bond line Al to Al	400 psi	4535601224468/ASTM D3163
Thermal Conductivity by LFA	<0.2 W / (m.K)	453560822409/ASTM E1461

RESINLAB L.L.C. MAKES NO EXPRESS OR IMPLIED WARRANTIES OR MERCHANTABILITY, FITNESS OR OTHERWISE with respect to its products. In addition, while the information contained herein is believed to be reliable, no warranty is expressed or implied regarding the accuracy of the data or the results to be obtained from the use thereof. All recommendations or suggestions for use are made without guarantee inasmuch as conditions of use are beyond our control. The properties given are typical values and are not intended for use in preparing specifications. Users should make their own test to determine the suitability of this product for their own purposes.

Surface Resistivity	1.71 x 10 <sup>16</sup> ohm/sq (@ 23 %RH)	455300006612/ASTM D257
Volume Resistivity	1.70 x 10 <sup>15</sup> ohm-cm (@ 18 °C)	
Dielectric Constant / Dissipation Factor		455300006513/ASTM D150
@ 100 Hz	6.3, 0.2	
@ 100 kHz	4.1, 0.05	
AC Dielectric Strength	449 V/mil (17.7 kV/mm)	ASTM D149 Method A, immersed in ASTM
		D3487 Type II Oil
		Specimen thickness was ~1-2 mm
Coefficient of Thermal Expansion by	88 ppm/°C below Tg	455300005340/ASTM E831
TMA	203 ppm/ °C above Tg	TMA, 5 °C/min
Transmittance	93.4% @ 6mm	ASTM D1003, Procedure A
Refractive Index	1.504	ASTM D542 / 589nm
Biocompatibility	Passes ISO 10993-5	MEM Elution Test
Biological Evaluation of Medical Devices		
Operating Temperature Range	-40 to 120 °C**	
Relative Thermal Index (RTI)	50 °C **	UL746B, Table 7.1
		Generic Value Based on Composition

<sup>\*</sup> Asterisk denotes values considered typical to associated resin systems or extrapolated from other test results.

### **INSTRUCTIONS:**

- 1. Bring both components to room temperature prior to mixing.
- 2. Cartridge format: Mixer should be attached keeping the cartridge vertical and any air pocket purged this way. After the mixer contains material, the mixer tip can be dropped to dispense pre-bleed amount. Attach a new static mixer with each cartridge, then pre-bleed the first 3 inches of dispensed material or until a uniform color is obtained. Maintain adequate velocity during dispensing to ensure complete mixing.
- 3. Bulk format: weigh and mix parts A and B accurately and thoroughly, scraping sides of container often. Do not pour from mixing container, transfer to a new container as residual unmixed material may cause a tacky spot on the surface of the casting. Maintain adequate velocity during dispensing to ensure complete mixing.
- 4. Allow to cure undisturbed until product is fully gelled or tack-free to the touch.
- 5. Clean up uncured resin with suitable organic solvent such as MEK, acetone or other organic solvent.

<sup>\*\*</sup> Operating Temperature Range is based on average design requirements and is not intended as a guarantee of suitability for all applications operating at that temperature.

<sup>\*\*\*</sup> This TDS contains values that have been updated. The values reported in this technical data sheet are typical values of the product, and are highly dependent on test conditions and methodology. We actively seek the most precise and accurate ways to measure and interpret performance of our products, and to update estimated values with measured values. The formula has not been revised or changed in any way. Although the values on paper have changed, you can expect the same performance of the product.

**SHELF LIFE AND STORAGE:** 

6 months at 25 °C Bulk.

12 months at 25 °C in cartridges that are foil bagged and desiccant packed.

Isocyanates are sensitive to moisture and should be kept in their original container or in a volume tank under dry nitrogen blanketing. Many isocyanates are prone to dimerization, the formation of a white precipitate. Products with minor amounts of this precipitate normally cure to full properties. Storage at 20 - 30 °C (68 °F to 86 °F) is recommended to ensure full shelf life.
