

<The register setting in case of fixed transmission speed>

Our customer doesn't use Auto negotiation function and they use following setting with 1000Mbps,100Mbps,10Mbps(fixed speed setting), our customer got following results.

①10Mbps : Link Up OK, transmission OK

②100Mbps : Link Up OK(it needs 10s until Link Up could operate), transmission OK

③**1000Mbps : Link Up NG, transmission NG**

→So, if you have some advice, could you let us know?
