R6547=49.9Ω

The image shows a portion of a printed circuit board (PCB) layout. A red callout box points to a specific resistor component, R6547, which has a value of 49.9Ω. The board features various components including a green component labeled 'QND', several blue components labeled 'R6547', and two blue components labeled 'V16.24A1'. There are also several circular components with four pins, likely connectors or sensors. The board is populated with numerous small blue and green components, and the layout includes various traces and pads.
