Change Notification / Sample Request****Date:** June 16, 2022**To:**

Dear Customer:

This is an announcement of a change to a device that is currently offered by Texas Instruments (TI). The details of this change are on the following pages, and are in alignment with our standard product change notification (PCN) [process](#).

TI requires acknowledgement of receipt of this notification within 30 days of the date of this notice. Lack of acknowledgement of this notice within 30 days constitutes acceptance of the change. If samples or additional data are required, requests must be received within 30 days of this notification, given that samples are not built ahead of the change.

The Proposed First Ship date in this PCN letter is the earliest possible date that customers could receive the changed material. It is our commitment that the changed device will not ship before that date. If samples are requested within the 30 day sample request window, customers will still have 30-days to complete their evaluation regardless of the proposed 1st ship date.

This particular PCN is related to TI's multiyear transition plan for our two remaining factories with 150-millimeter production (DFAB in Dallas, Texas, and SFAB in Sherman, Texas). DFAB will remain open, but will focus on 200-mm production, with a smaller set of technologies. SFAB will close no earlier than 2024 and no later than 2025. As referenced in the "reason for change" below, these changes are part of our multiyear plan to transition these products to newer, more efficient manufacturing processes and technologies, underscoring our commitment to product longevity and supply continuity.

For questions regarding this notice or to provide acknowledgement of this PCN, you may contact your local Field Sales Representative or the PCN Team ([PCN\\_ww\\_admin\\_team@list.ti.com](mailto:PCN_ww_admin_team@list.ti.com)). For sample requests or sample related questions, contact your local Field Sales Representative. As always, we thank you for your continued business.

<b>PCN Details</b>					
<b>Description of Change:</b>					
Texas Instruments is pleased to announce the qualification of a new fab & process technology (RFAB, LBC9) and assembly (MLA) site/BOM options for selected devices as listed below in the product affected section.					
<b>Current Fab Site</b>			<b>New Fab Site</b>		
<b>Fab Site</b>	<b>Process</b>	<b>Wafer Diameter</b>	<b>Fab Site</b>	<b>Process</b>	<b>Wafer Diameter</b>
SFAB	JI1	150 mm	RFAB	LBC9	300 mm
The die was also changed as a result of the process change.					
Construction Differences are as follows:					
<b>Group 1 – BOM option at MLA</b>					
		<b>Current</b>		<b>Additional</b>	
Bond wire Composition/diameter		Au/0.8, 0.96 mil or Cu, 0.96 mil		Cu, 0.8 mil	
<b>Group 2 – MLA as an additional Assembly site</b>					
		<b>Current</b>		<b>Additional</b>	
Bond wire Composition/diameter		Au, 0.96 mil		Cu, 0.8 mil	
Qual details are provided in the Qual Data Section.					
<b>Reason for Change:</b>					
These changes are part of our multiyear plan to transition products from our 150-millimeter factories to newer, more efficient manufacturing processes and technologies, underscoring our commitment to product longevity and supply continuity.					
<b>Anticipated impact on Form, Fit, Function, Quality or Reliability (positive / negative):</b>

#### Green/Pb-free Status:

Qualified Pb-Free (SMT) and Green

Note (1): T0 failing units got mixed back in with passing ones for the post-stress test resulting in false fails. See 8D attached to the eQDB

Note (2): Fails due to faulty BI sockets. See 8D attached to the eQDB

Note (3): Fails were due to mechanical damage from mishandling at test. Discounted.
