Download image BSL with scripter

By Gary Gao

1. Down load the scripter http://software-dl.ti.com/msp430/msp430_public_sw/mcu/msp430/MSPBSL_Scripter/latest/index_FDS.html
2. Install the scripter
3. Find the "BSL-Scripter.exe" in your install path
4. Find the examples in the folder named "ScriptExampleWindows" based on your device and communication method. Then copy "BSL-Scripter.exe" in the example folder to make sure the folder include the files like below:

5. Put your .txt image file in the example folder and change the image name in the file "script_FRxx_uart.txt" (For more command refer to scripter user's guide)
6. Setup the hardware refer to the chapter 4.2 in the scripter user's guide http://www.ti.com/lit/ug/slau655f/slau655f.pdf
7. Open your CMD window and make sure the current path to the example folder. Then execute scripter's command. Take the FRAM devices with UART like below:
