

Letter of Volatility				
Part Number(s): TMS320F28232 TMS320F28234 TMS320F28235 TMS320F28332 TMS320F28333 TMS320F28334 TMS320F28335	Package Types: 179 pin BGA 176 pin BGA 176 pin LQFP	Temperature Ratings: A/S/Q	Manufacturer: Texas Instruments	
			Street Address: POST OFFICE BOX 655303	
			City: Dallas	State: TX Zip: 75265
Volatile Memory				
Does the item contain volatile memory (i.e., memory whose contents are lost when power is removed)? ☒ Yes ☐ No				
If the answer is 'Yes', please provide the following information for each type (use additional sheets if required):				
Type (SRAM, DRAM, etc.): SRAM	Size: 68KB	User Modifiable: ☒ Yes ☐ No	Function: Working memory used for storing data variables or executable CPU/CLA program code	Process to Sanitize: Power off for 10 seconds to allow bits to return to a default state on subsequent power on
Non-Volatile Memory				
Does the item contain non-volatile memory (i.e., memory whose contents are retained when power is removed)? ☒ Yes ☐ No				
If the answer is 'Yes', please provide the following information for each type (use additional sheets if required):				
Type (BBRAM, Flash, EEPROM, etc.): Flash	Size: 512KB	User Modifiable: ☒ Yes ☐ No	Function: Working memory used to store either user program code for the CPUs or user data	Process to Sanitize: Run Flash Erase algorithm to reset the programmed bits/words/sectors back to erased state of 0xFFFF. Please see the TMS320F2833x datasheet for timing and endurance information
Type (BBRAM, Flash, EEPROM, etc.): User Configurable OTP(One Time Programmable) ROM	Size: 2KB	User Modifiable: ☒ Yes ☐ No	Function: One Time Programmable Memory, User programmable used to store device configuration info such as the link pointers.	Process to Sanitize: Programmed bits cannot be re-used. If sanitization is required all bits in a section/word could be programmed to all 0x0000, but that section cannot be re-used
Type (BBRAM, Flash, EEPROM, etc.): TI OTP(One Time Programmable) ROM	Size: 2KB	User Modifiable: ☐ Yes ☒ No	Function: One Time Programmable Memory, Reserved for TI use to store device parameters, trims, test data. No user data stored.	Process to Sanitize: NA
Type (BBRAM, Flash, EEPROM, etc.): Boot ROM and Secure ROM	Size: 16KB	User Modifiable: ☐ Yes ☒ No	Function: Boot Code, Math Lookup Tables, no user data stored	Process to Sanitize: NA
Media				
Does the item contain media storage capability (i.e., removable or non-removable disk drives, tape drives, memory cards, etc.)? ☐ Yes ☒ No				
If the answer is 'Yes', please provide the following information for each type (use additional sheets if required):				
Type (Disk, Tape, etc.): Removable: ☐ Yes ☐ No	Size:	User Modifiable: ☐ Yes ☐ No	Function:	Process to Sanitize:
Additional Information:
