

Question-1
 I use this cycle and output current. (Output capacitor is 10uF x 2.)
 Does the output current of 300mA destroy LP5900?
 Please teach me whether LP5900 is destroyed or not.

Question-2
 I simulated by TINA.
 I observed the reverse of the output current of LP5900. (The observed point is AM1.)
 Please teach me the reason of the reverse.
 Please teach me whether LP5900 is destroyed or not.
