

- No PFC
- Input : AC:85V-115V
- Output : Output is 2 outputs from the transformeris.
- Operating frequency: 100 Khz

Question

- 1 We are using UCC 25630X and think about the above power supply, is it possible to realize?
- 2 I am planning to create an evaluation board for the power supply as described above. When creating a transformer, what kind of transformer should be made Usage example, Is there a transformer application note?
- 3 How can I configure the tap of the transformer?
