

## LM(2)5085 COT PFET Buck Switching Controller Quick Start

Revision date: June 2, 2009 - Ver. 1.2

Note: The components calculated in this worksheet are reasonable starting values for a design using the LM(2)5085. They are not optimized for any particular performance attribute. The most recent version of this excel file can be found in the product folders of the parts at national.com. Make sure to input or select values in all of the blue shaded cells even if a value already exists in that cell. Blue shaded cells require input from user.
