

PCB Layout of TPS65218

L1

L3

A stylized illustration of a circuit board. The background is a dark, textured grey. Overlaid on this are various electronic components in bright colors: yellow, orange, and red. These include numerous small circles representing resistors, larger circles with internal patterns for capacitors, and complex, multi-pin shapes for integrated circuits. A network of white and yellow lines represents the circuit traces, connecting the components across the board. The overall aesthetic is technical and modern.
