TI Symbol Identification

All QFN/SON/BQFN products shall be inspected 100% to the V/M quality criteria specified.

The following package characteristics related to product symbolization are cause for rejection:

**a. Wrong symbolization - symbolization content not in accordance with the symbolization specification.

**b. Missing symbolization - any missing top symbolization is rejectable, unless otherwise specified by customer.

**c. Illegible top symbol - all character and logo must be recognizable and must not be confused with a different letter or number with the unaided eye when viewed under the following conditions:

1) normal room lighting, or

2) 10-inch distance (for laser marking).
