

TS1:

I could not capture any interesting just the clock of the measurement of temperature.

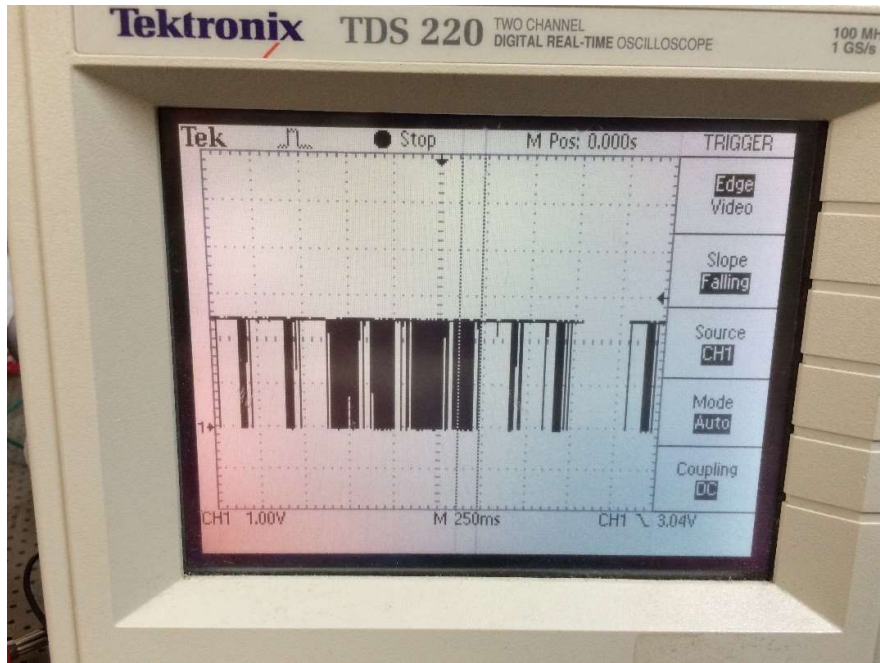

DSG: (turn off for few seconds)

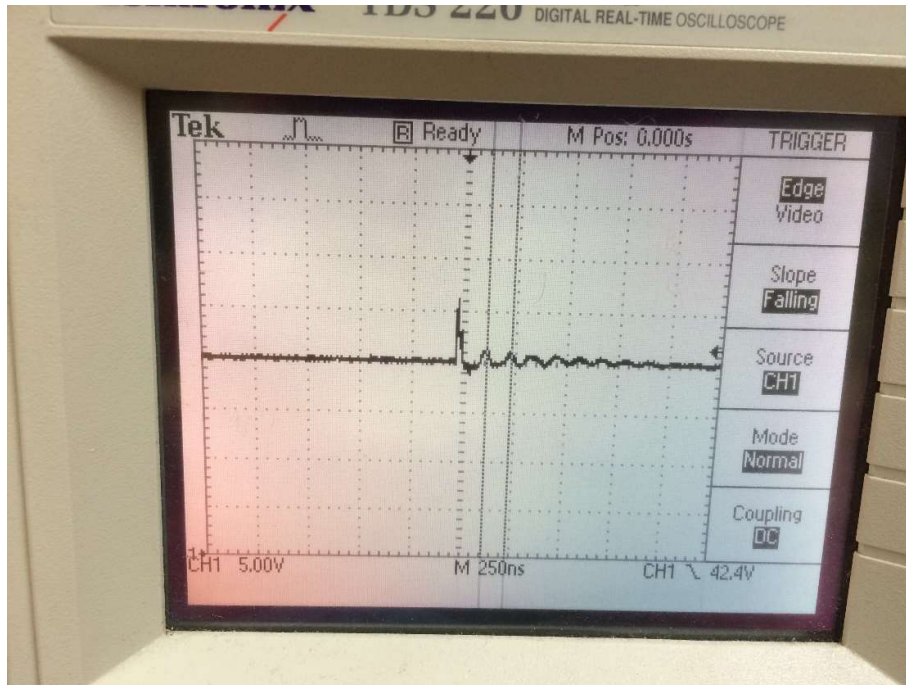

SDA: (the black area comes until is attacked)

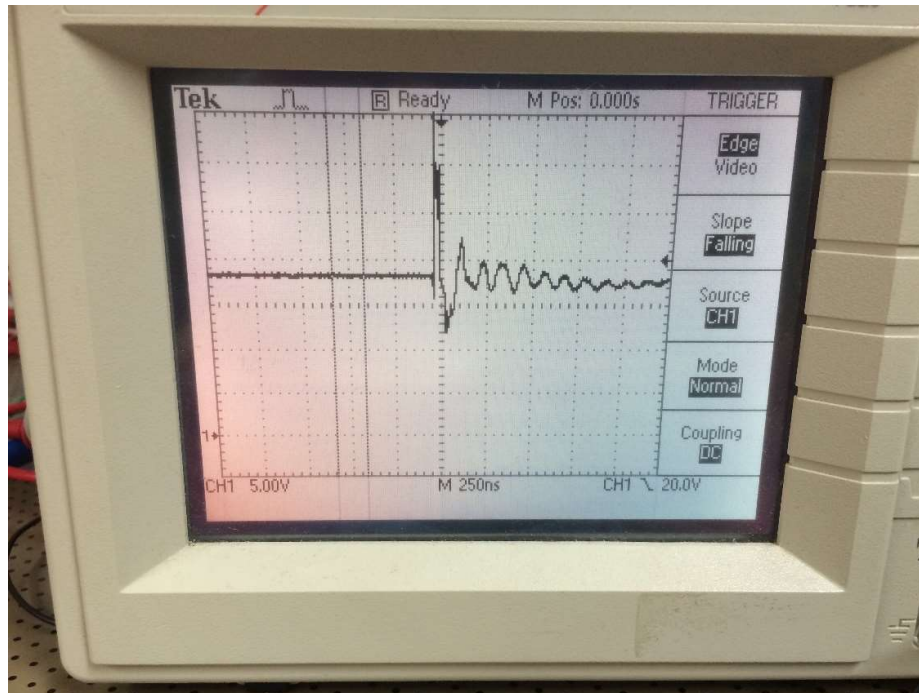

SCL: (black area with a lot of command comes until is attacked)

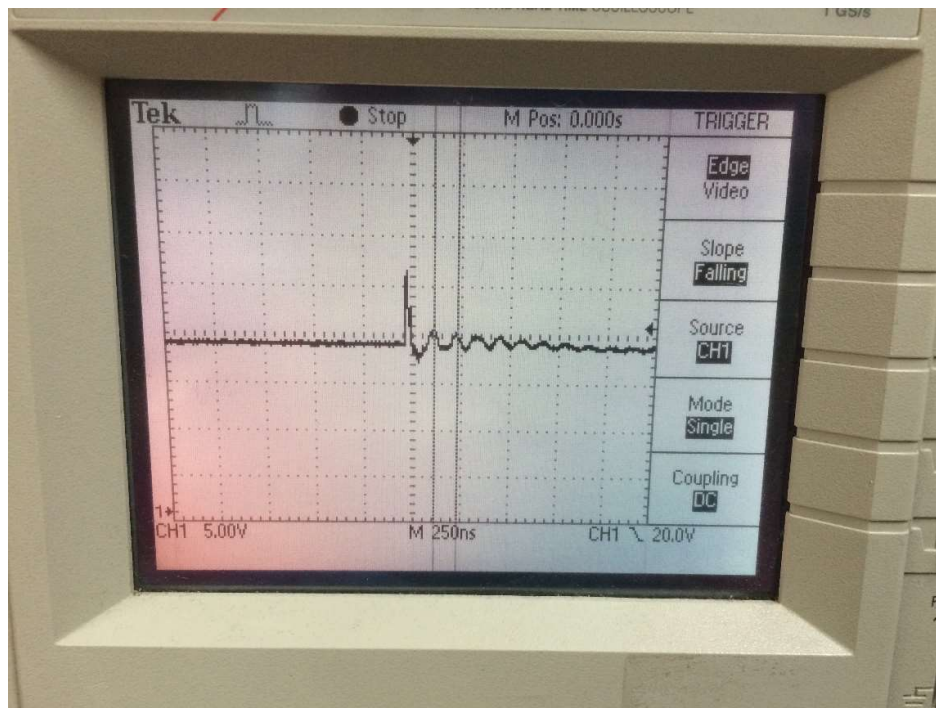

BAT: (it was the biggest peak)

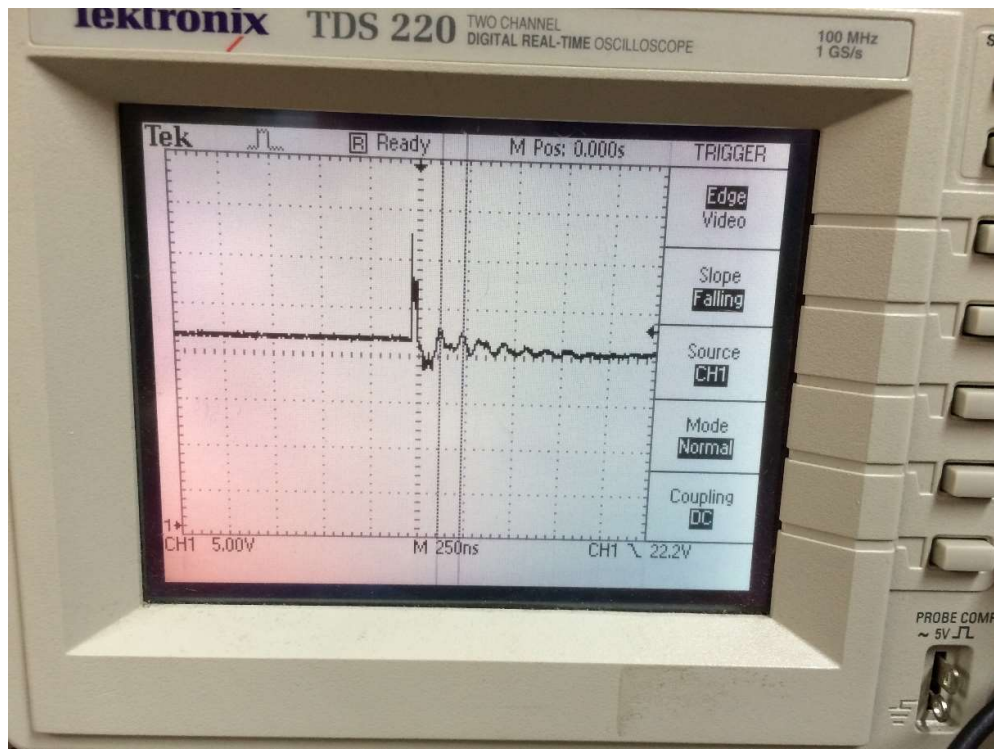

REGSRC: (after that boot signal to TS1 was needed)

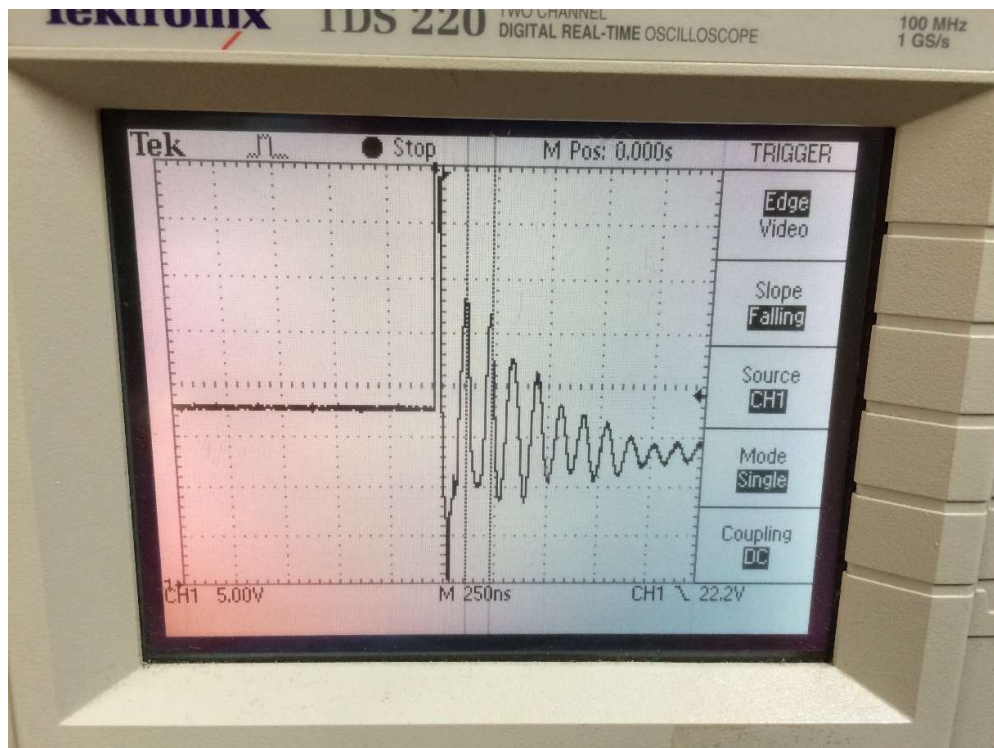

REGSRC: (after that was not needed boot signal to TS1):

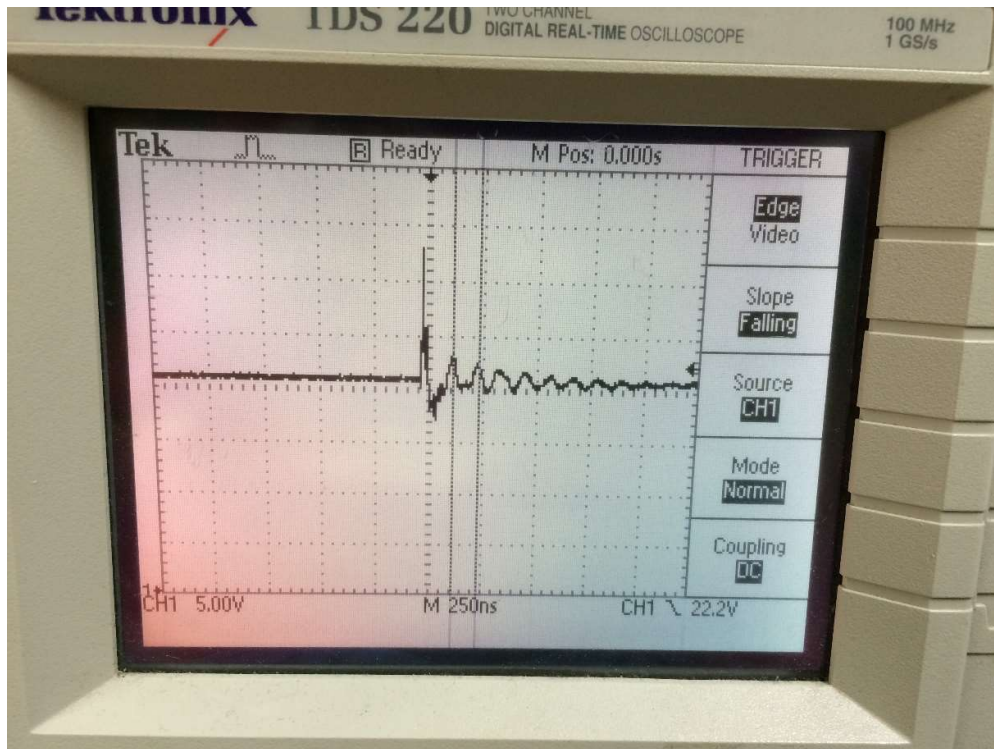

VC5: (boot was not needed)

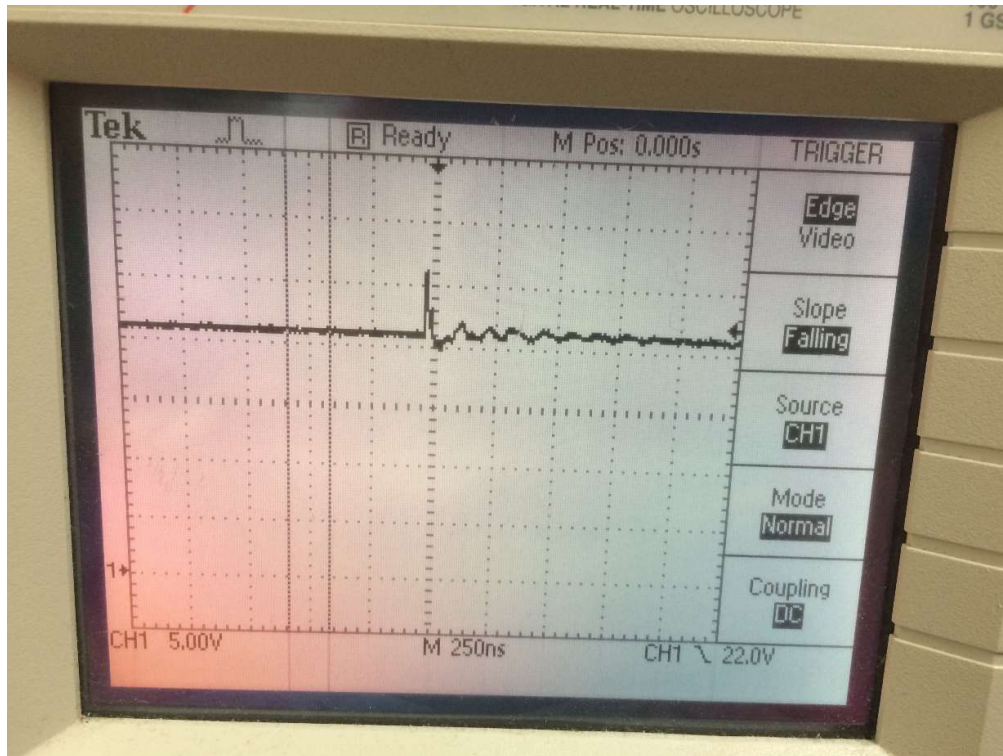

VC5: (boot was needed)

VC5B (boot was needed)

VC5X:

VC5X: (boot signal to TS1 was needed)
