

# The comparison by feeding devices

PSE : A-company PoE Hub

Voltage drop : 42.4V  
Inrush current : 900mA

PSE : B-company PoE Injector

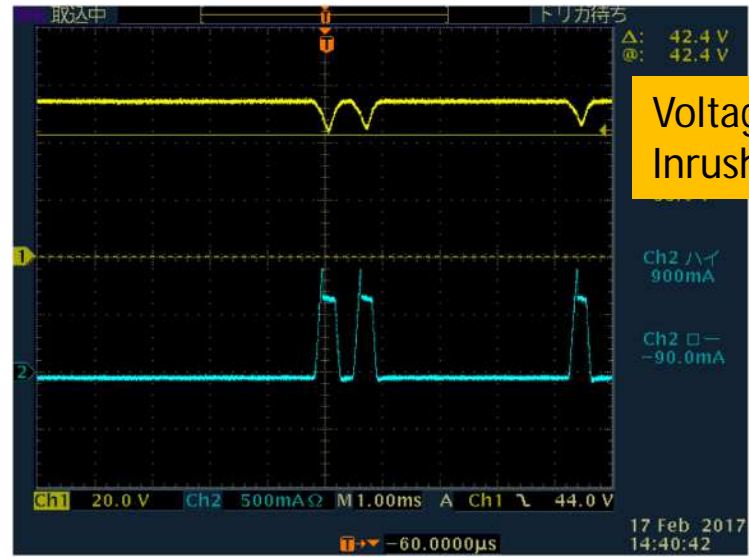

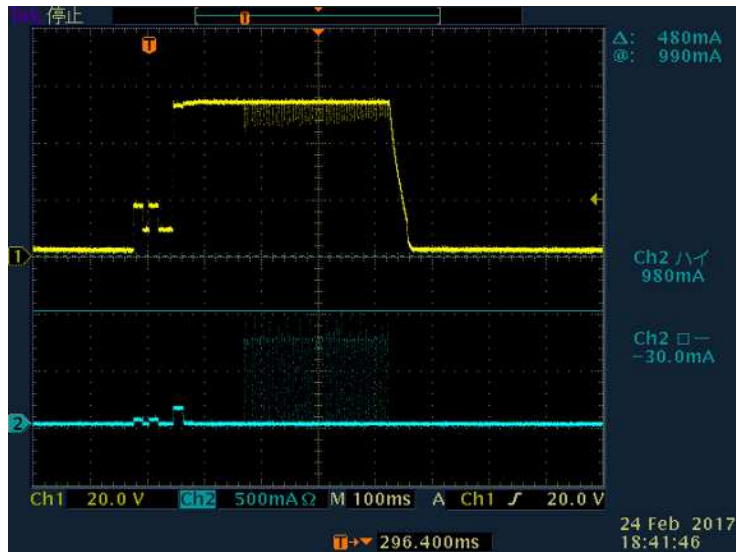

Voltage drop : 46.4V  
Inrush current : 930mA

This malfunction may not occur by the feeding ability of the feeding device.

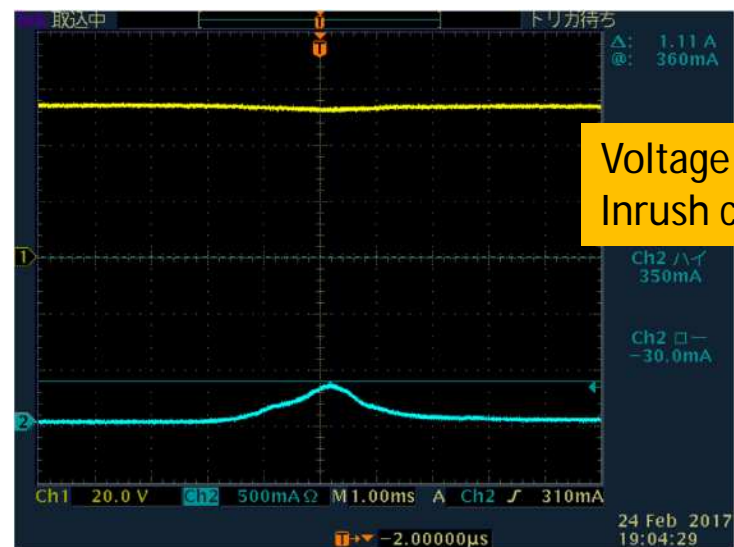

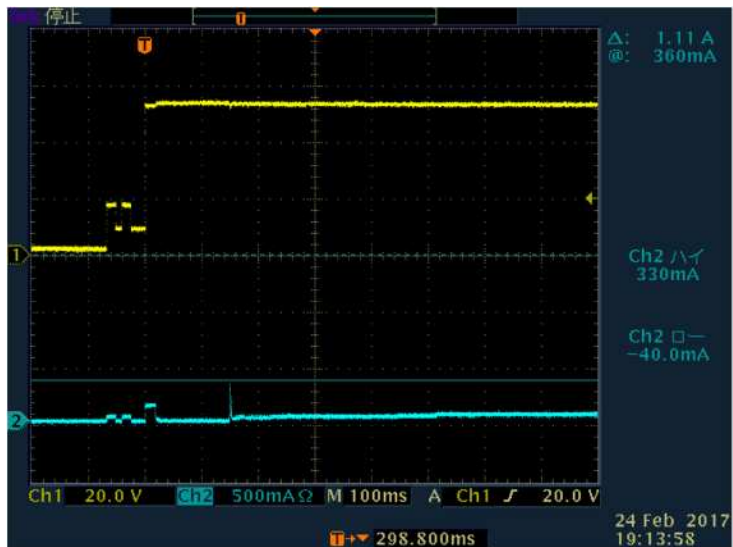

# The comparison by measures

## APD-Pin Floating

Voltage drop : 42.4V  
Inrush current : 900mA

## APD-Pin Connecting to RTN

Voltage drop : almost 0V  
Inrush current : 350mA
