

Ch1 : Input voltage
24V(VCC-MAIN)

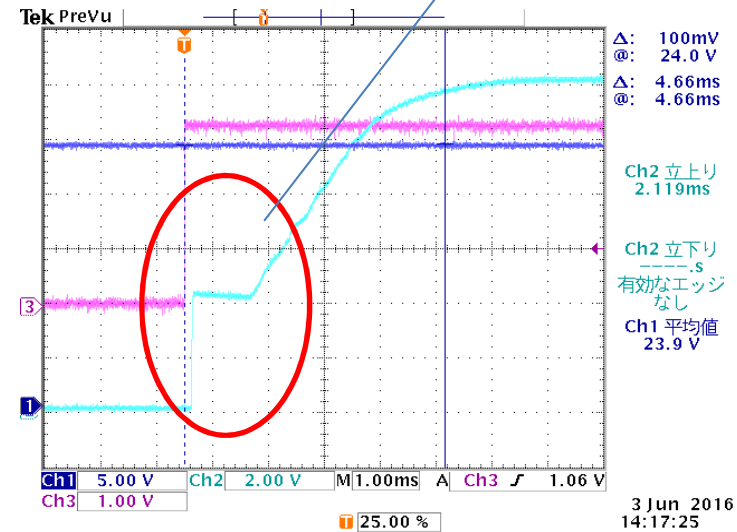

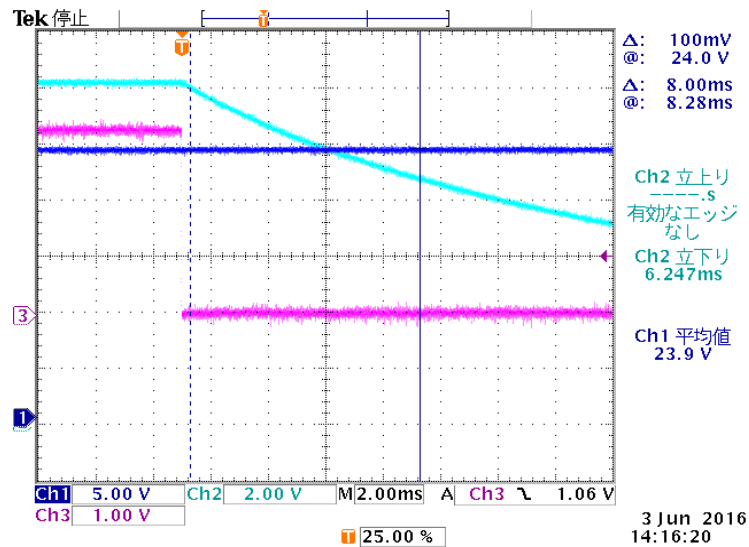

Ch2 : output voltage
12V(VCC-TCON)

Ch3 : NE pin

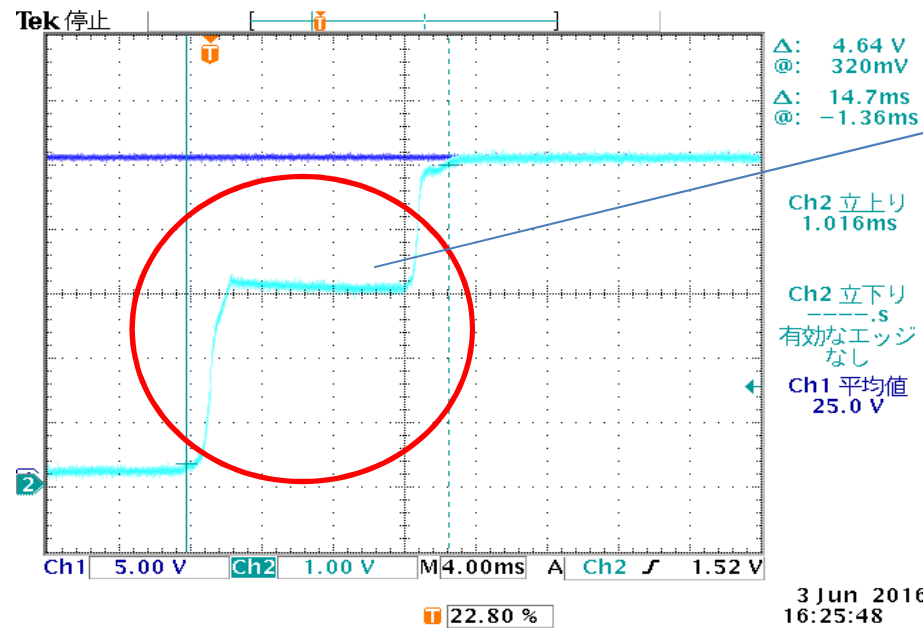

Input:24V
EN:H→L→H
2second

It's like stairs.

TI EVM Boad Evaluation

Ch1 : Input voltage
24V(VCC-MAIN)
Ch2 : output voltage
5V

It's like stairs.

It's a question.

En pin : When it's shorter than 2 seconds.

Why will output be like stairs?
