TPS22963C Review

HWG-HIPT

1. Use TPS22963C for USB_VBUS power supply
2. Connect a pull-down resistor to the ON ball of TPS22963C to set it to Off by default and connect it to AP-GPIO to control it.
3. Prevents power conflict with SYS_5V when there is an external power source supplied via USB_VBUS.
4. USB Spec : 5V, 500mA

Telechips Inc.

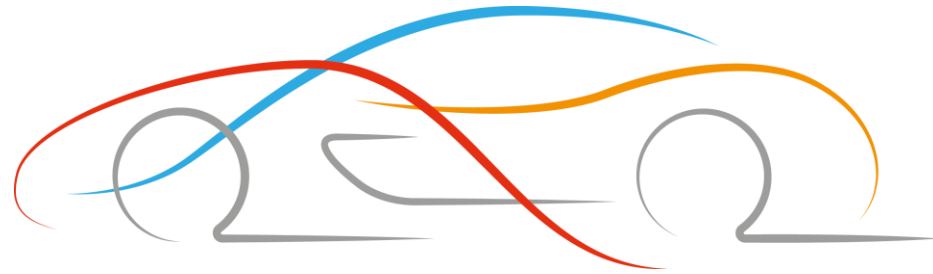

Fabless Company

Creating and Leading Future Technology of Digital Life

Established	October 29, 1999
CEO	JangKyu Lee
Paid in Capital	USD 5.83M (KRW 6,753M) (As of Dec. 2019)
IPO	2004 (KOSDAQ)
Products	Application Processor, Companion Products
Employees	Telechips 351 (R&D : 67%) Incl. Overseas ChipsMedia 75 Autosilicon 25 Mindin 6
Business Area	Automotive (ADAS/ Cockpit / IVI / Cluster / SVM / HUD) Consumer Electronics (STB)
