

# Haptic Control Console Release Notes

Version: 1.6.0.1

Release Date: 21-Jan-2019

## Updates

1. Updated firmware of DRV2624EVM-CT to add support for Windows 10 PCs.
2. Tested all GUI features for DRV2624 and created the test plan.
3. Fixed issue – Changing the value of SAMPLE\_TIME from DRV2624 Console page does not write to device.

### **Steps to update firmware:**

1. After Installation, the updated firmware will be available in “<<installed directory>>/HapticControlConsole 1.6.0.1/EVMFirmwareUpdater/Firmware/DRV2624EVM-CT-1p7.txt”.
2. Open HapticControlConsole.exe
3. Go to Help -> Firmware Update
4. Follow the instructions mentioned to update the Firmware
  - a. Disconnect EVM
  - b. Hold BSL button and plug in EVM to USB
  - c. Scan Device
  - d. Select Firmware File by “Open FW”. (Open the firmware file DRV2624EVM-CT-1p7.txt)
  - e. Press “Update”
