

BOOSTXL-DRV8305EVM board

When I drive motor,
The difference of Q4-4(GL_A) waveform occurred
between normal board and wired(20mm) board.

If there are recommendation of distance between
Q4_1,2,3-R4,
could you teach me?

And, if there are recommendation of distance between
R4-GND plane,
could you teach me?

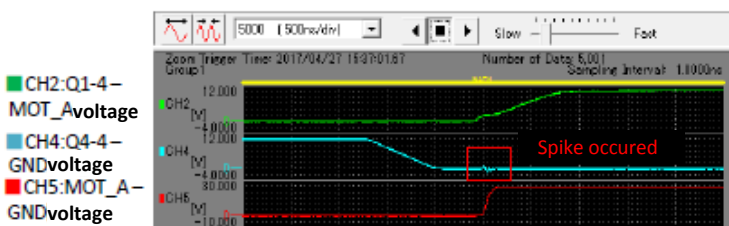

①Wired 20mm. Q4-4 rising edge

②normal board. Q4-4 rising edge

③Wired 20mm. Q4-4 falling edge

④normal board. Q4-4 falling edge
