Where does this connector connect to?

● Inquiry about LMX2594PSEVM Evaluation Kit.

I would like to add one LMX2594PSEVM in Fig.2 to the LMX2594PSEVM Evaluation Kit in Fig.1 and perform the following evaluation while synchronizing four LMX2594s.

①Connection method1

Please tell me where to connect the A part connector that I wrote on the first page.

②Connection method2

Could you give me a document that shows the connection information in this case?

(Connection information needed to test four LMX2594s)
