

The screenshot shows the TI Studio IDE interface. The top bar includes tabs for 'Problems', 'Terminal', and 'RTOS Object View (ROV)'. The 'Exception' tab is active in the main window, displaying a table of exception call stack entries. The table has three columns: 'Property', 'Value', and an unlabeled column. The first entry is highlighted in blue.

Property	Value	
▶ Decoded exception		
▶ Exception context		
▼ Exception call stack		
0 ti_sysbios_knl_Task_unblockl__E(struct ti_sysbios_knl_Task_Object *, unsigned int) at Task.c:1264	PC...	
1 ti_sysbios_knl_Task_unblockl__E(struct ti_sysbios_knl_Task_Object *, unsigned int) at Task.c:1264	PC...	
2 <symbol is not available>	PC...	

The left sidebar shows a project tree with 'Favorites' and 'Viewable Modules'. The 'Viewable Modules' list includes: BIOS, Clock, Diags, GateHwi, GateMutex, HeapMin, Hwi, Idle, Queue, Registry, Semaphore, Startup, Swi, System, Task, and Timer. The 'All Modules' list includes: ti and xdc.
