

This case is using PCM4204(ADC:4CH, Input:4CH).  
So, in case of PCM1863, ADC is 2CH, Inputs are 4CH.

<Question>

How will TDM Data Format be?

- Is the data of Slot1 selected VINLX inputs by the multiplexer?
- Is the data of Slot2 selected VINRX inputs by the multiplexer?

Is our recognition correct?
