# Windows | Hardware ID collection in I

# Windows | Hardware ID collection II

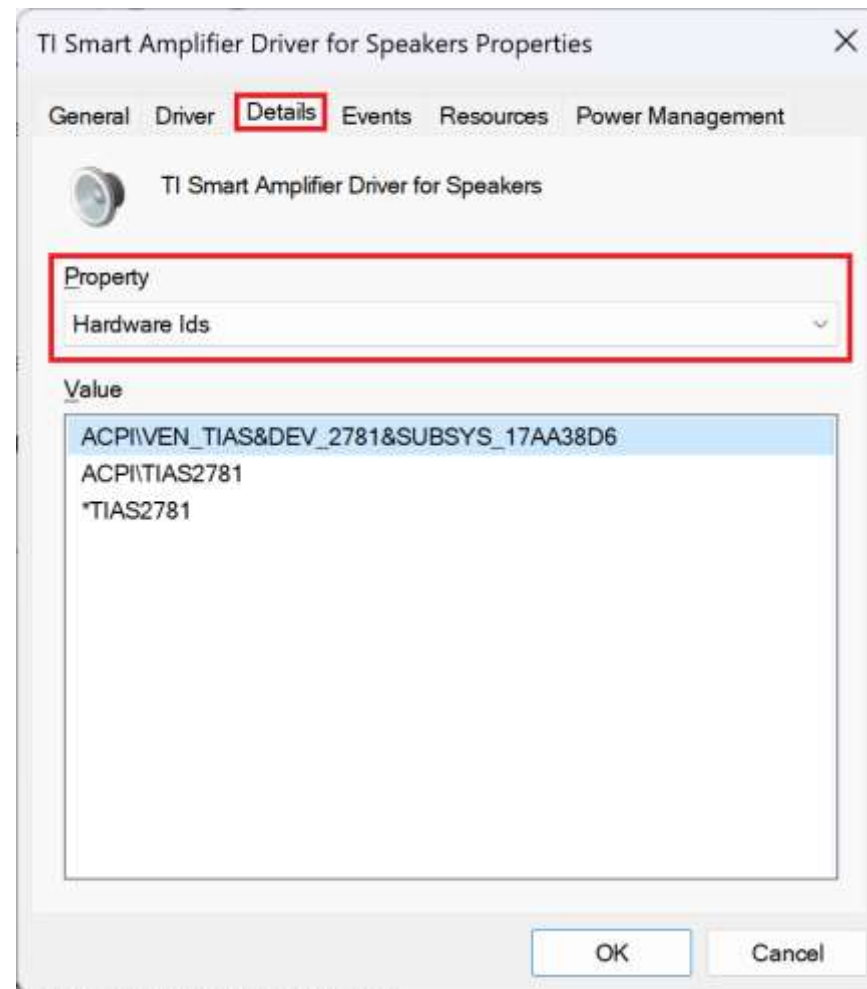

# Windows | Hardware ID collection III

# Windows | Hardware ID collection IV

- Goto Details page and set “Hardware Ids”, then screenshot it and send it to me, I’ll check the hardware id.

# Linux | Confirm which i2c bus tas2781s are on I

```
# pushd /sys/bus/i2c/devices
```

```
# ls -al
```

PS:

- Then screenshot the Command Terminal, and send it to me, I will check it, too.
- Next page is the example, please pay attention on which i2c bus the TIAS2781 is. This information can help us to confirm how many pieces of tas2781 in your laptop.

# Linux | Confirm which i2c bus tas2781s are on II

```
root@CompterClub:/sys/bus/i2c/devices# ls -al

```

# Linux | Check how many pieces of tas2781

```
root@smartamp-INVALID:/sys/bus/i2c/devices/i2c-3# i2cdetect -r 3
WARNING! This program can confuse your I2C bus, cause data loss and worse!
I will probe file /dev/i2c-3 using receive byte commands.
I will probe address range 0x08-0x77.
Continue? [Y/n] y

root@smartamp-INVALID:/sys/bus/i2c/devices/i2c-3#
```

- Install i2c-tools  
# apt install i2c-tools
- Run i2cdetect  
# i2cdetect -r 3  
PS: 3 is the i2c bus number, pls use the correct number in your system.
  - "UU", means this address is currently in use by a driver".

# Linux | ACPI collection

- Copy all the table files in /sys/firmware/acpi/tables, and send to US.

```
root@home: /sys/firmware/acpi/tables
