

Launch Advanced Design System

From popup helper select Unarchive. This can also be selected in the Main panel from File>Unarchive...

Browse to locate and select ADC12DJ3200.7z and click Open.

Choose the location to save the unarchived results:

When finished a schematic and eye diagram plot window will open. You may need to Move or Maximize the schematic and/or plot window to make them visible.

The schematic does not include any circuit board transmission line details. That should be added using the .s4p file representation of the board transmission line.
