

[illegible]

Timing diagram showing the relationship between P1_AAD0 (purple) and P1_AAD1 (cyan) signals over time. The x-axis is Time (ps) from 0.00 to 450.00. The y-axis is voltage from -100.00 to 600.00 mV. P1_AAD0 is a high-frequency signal oscillating between approximately -500 mV and 500 mV. P1_AAD1 is a lower-frequency signal oscillating between approximately -500 mV and 500 mV. A small cyan diamond marker is visible on the P1_AAD1 signal at approximately 200 ps.
