

# XDS110 probe firmware modification

**MSP Team**

# XDS110 probe default firmware

```
<<<< Device 0 >>>>
VID: 0x0451    PID: 0xbef3
Device Name:   XDS110 Probe with CMSIS-DAP
Version:       3.0.0.25
Manufacturer:  Texas Instruments
Serial Num:    00000000
Mode:          Runtime
Configuration: Standard

Found 1 device.
```

Incorrect serial number will make error when use UniFlash CLI to do a factory reset.

It should be modified to ML130001 when load program to M0L series via CLI (if not use factory reset, it will have no error.)

# XDS110 probe firmware update

- (1) Find the XDS tool in CCS install path: (using CCS 12.3 or newer)

`C:\ti\ccs1220\ccs\ccs_base\common\uscif\xds110`

Used in step 3-1.

- (2) There will be a instructions of how to use the tool.

<input type="checkbox"/> Name	Date modified
 boot_loader.axf	11/29/2022 6:34 AM
 boot_loader.bin	11/29/2022 6:34 AM
 eZ_FetDcdcController.txt	11/29/2022 6:34 AM
 firmware_3.0.0.22.bin	11/29/2022 6:34 AM
 xds110reset.exe	11/29/2022 6:34 AM
 XDS110SupportReadMe.pdf	11/29/2022 6:34 AM
 xdsdfu.exe	11/29/2022 6:34 AM

- (3) Use command of windows to use the tool.

# XDS110 probe firmware update

(3-1) Update the file path of cmd

```
C:\Users\ >cd C:\ti\ccs1220\ccs\ccs_base\common\uscif\xds110
```

Do NOT forget add .exe in the cmd line.

(3-2) Check the information of XDS110 probe

```
C:\ti\ccs1220\ccs\ccs_base\common\uscif\xds110>xdsdfu.exe -e

<<<< Device 0 >>>>
VID: 0x0451   PID: 0xbe3
Device Name: XDS110 Probe with CMSIS-DAP
Version:     3.0.0.25
Manufacturer: Texas Instruments
Serial Num:  ML130001
Mode:       Runtime
Configuration: Standard

Found 1 device.
```

Note:

1. Here is the information which is already updated
2. The method to update the serial number (it is described in SupportReadMe.pdf file, Page 4):

2-1 xdsdfu.exe -m

2-2 xdsdfu.exe -s ML130001 -r

Then the serial number is updated.

# Modify .GEL file for auto factory reset

# Modify .GEL file for auto factory reset

(4) Execute factory reset before loading the images.

(4-1) Update the .gel file to modify a one-shot time factory reset before loading images

Note: Only put the .gel file into the path, and make sure the file name is the same as previous file.

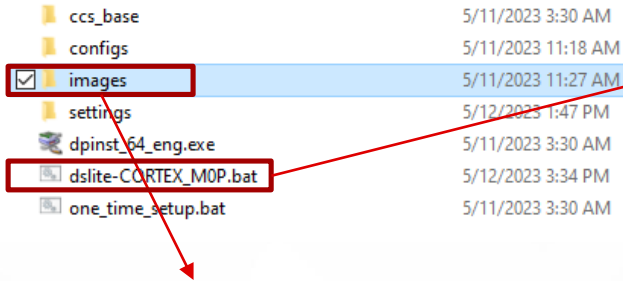

[This requires non-modification of .ccxml file]

(4-2) Double click on  **dslite-CORTEX\_M0P.bat** , and it will automatically do a factory reset and load the program into the device

# BACK UP

# How to select the images for loading

(1)

Put the images need to be loaded in the folder.

(2)

```
set GENERATED_COMMAND=-c configs/MSPM0L1306.ccxml -l
settings/generated.ufsettings -s VerifyAfterProgramLoad="No verification" -e -f
-v "images/timx_timer_mode_periodic_sleep_LP_MSPM0L1306_nortos_ticlang.txt"
set ADDITIONALS=
```

Change the path to your individual loaded file name and path.
