

The image shows two pin headers for the CC3200TAG and CC3200UART modules. Each header is a 5-pin header with pins numbered 1 to 5. The CC3200TAG header has pins 1 to 4 labeled CC_TMS, CC_TCK, CC_TDO, and CC_TDI, respectively, and pin 5 is labeled GND. The CC3200UART header has pins 1 to 4 labeled CC_TX, CC_RX, CC_RTS, and CC_CTS, respectively, and pin 5 is labeled GND. The headers are shown in a dashed box with a red border.

The diagram shows a push button labeled 'S1' with a 'DTSM-3' symbol. One terminal of the button is connected to 'GND'. The other terminal is connected to a green line labeled 'BTN1'. This line then passes through a resistor labeled '100k R18' before reaching 'VCC'.
